20250113 Client Meeting

13 Jan 2025 |7:00PM

Attendees: everyone except for saud

Notes

- Updates from Dr Will
    - Good traction with the number of users over the past year
    - Marketing → Word of mouth (WOM)
    - Use the products from last yr → but this yr we have made some improvements (doesnt reflect fully)
    - Convert into a viable business strategy since it's a free source ATM → google form for user feedback/ market research
        - Understand what's the problem and what went well
        - Understand what are the main concerns and which are the more difficult ones for the users to prepare for
        - Feedback: incorrect rationale/ unrealistic professional scenarios/ inconsistent
        - Most useful to be added: Mock questions based on GMC guidelines → flashcards → timed, full-sized mock exam → what we're currently doing is contributing to > 50% of the feedback
        - Ppl spend more time in creating flashcards than using flashcards → get rid the time spent on this
- Update on UI/UX // General updates
    - Dashboard
        - New features: Streaks
    - Focus on mini mock and full sized mock// scheduling features // duolingo/ gamification feature
    - Time limit and MCQ updated for mini mock
    - Just made the UI for Review Screen and also the results page
- New feature
    - NOT PRIORITY: Have average mark and it skews when there are more user scores in → check whether the user is in the average range or not

FOCUS: Polish on scheduling and work on mini-mock

Q&A

- Is there any way we can access the data? Dr Will will add the team as collaborator
- How's the progress with scheduling flashcards? And how's the function working with the popup? We have the flashcards registered in the database but might hv smth wrong with the previous yr's code → almost there.
